**CARDIO
DELTA**

11TH ANNUAL MEETING OF

**CARDIO
STEPS**

in collaboration with
**EGYPTIAN SOCIETY
OF CARDIOLOGY & KFS-MSS**

14-15 2023
SEP

HILTON CAIRO,
HELIOPOLIS HOTEL

UNION
IS
POWER

2ND ANNUAL MEETING OF
**CARDIO
DELTA**

11TH ANNUAL MEETING OF
**CARDIO
STEPS**

UNION
is
POWER

Dear colleagues and friends,
On behalf of the board of 2nd
CARDIO DELTA and 11th
CARDIO STEPS that will be
held from 14-15th September
2023 in Hilton Cairo Heliopolis,
it is our pleasure to announce
the first conjoined mega in
collaboration with Egyptian
society of cardiology and
KFS-Medical Scientific
Society.

Join

A POWERFUL UNION

We'll present and talk about the most recent developments in interventional cardiology, general cardiology, and critical care cardiology. To better serve the needs of young cardiologists in the area on a daily basis, this major conference will emphasize interactive educational sessions and practical clinical supervisory skills.

In order to distinguish this conference as the most unique and exclusive opportunity in the area, this creative approach will launch a new initiative in how physicians actively participate in the conference.

This gathering's major objective is to bring together all enthusiastic operators—beginners and experts—in one location in an environment of openness and camaraderie.

The opportunity will allow the newly trained interventional operators to improve their abilities, advance in learning new tactics appropriate to their experience level, and enhance our daily practice of percutaneous coronary interventions (PCI).

The basics, insider knowledge, and mastery of CTO and CHIP methods must be learned or reviewed in order to manage difficult coronary patients. Through a logical combination of practical lectures, case demonstrations, and giving attendees the chance to actively participate in live-in-box procedures and medical case scenarios that would range from common to cutting-edge, basic and complex issues faced in daily practice will be addressed in-depth.

The presence of international professionals throughout the world will present excellent opportunities for knowledge and experience exchange between various nations.

Interventional cardiologists are eager to create CTO PCI programs in their cath labs in an increasing number of cases. Moreover, structural cardiac intervention, as well as 2023's new developments.

The fields of cardiology such as antithrombotic, hypertension, dyslipidemia, heart failure, ischemia, and dyslipidemia will be beneficial to general cardiologists.

CARDIO DELTA - CARDIO STEPS BOARD

BOARD AND CHAIRMEN

**PROF.
AMR
ELHADIDY**

Professor of Cardiology,
Cairo University
Cardio Steps Chairman
President elect of EGIC

**PROF.
OSAMA
SANAD**

Professor of Cardiology,
